About our Student Clinics

All of our students who are enrolled in our accredited courses, are required to complete supervised clinical hours at Kinesiology Connection.

Students work with clients using Kinesiology under the direction of qualified clinic supervisors, which provides them with invaluable hands-on workplace experience and confidence when treating members of the general public, and with assessing and treating various imbalances in the body.

Our student practitioners will be at varying levels throughout their Diploma study, and we therefore offer these sessions to the public at reduced rates. However, as we train our students to a very high level, this will in no way diminish your benefit of attending a PKP Student Clinic. To assist in providing our students with a wide variety of clients, your Student Practitioner will be allocated by the College.

Come and experience a Kinesiology session with a PKP Student Practitioner.

For Bookings - Only \$30.00 per session
